(3) comply with the Duty to Cooperate

Yes

No

Don't know

Please provide further information in relation to the previous question. e.g. why you do or do not consider the Local Plan to be legally compliant or sound.

It tries to make a case for using the green belt that I do not believe is correct. It does not fulfil the criteria for exceptional circumstances.

(Continue on page 4 if necessary)

Please set out any modifications you consider necessary to make the Local Plan legally compliant or sound, having regard to your comments above. (NB - any non-compliance with the duty to co-operate is incapable of modification at examination).

It will be helpful if you could put forward your suggested wording of any policy or text as precisely as possible.

I think the whole thing should be re-assessed. The argument for such a large amount of housing in the area is not sufficiently compelling, particularly as there is so much housing already going up all around.

Certainly putting a new development of such scale at Culham, so near Abingdon, is ridiculous.

Would you like to participate at the oral part of the examination, which takes place as part of the examination process? \*

(Continue on page 4 if necessary)

Yes

No

\* **Please note:** the inspector will determine the most appropriate procedure to hear those who have indicated that they wish to participate at the public hearing.

**Further comment:** Please use this space to provide further comment on the relevant questions in this form. **You must state which question your comment relates to.**

**The problem of traffic is a very real one already. We drive our son into Abingdon every weekday and have to leave very early to be sure to miss the heavy traffic. This is before any additional housing. I would be very surprised if a comprehensive study of traffic during peak hours, during term-time would conclude that there is room for the excessive increase that such housing at Culham would incur. It also only takes an accident on the A34 to bring all of the alternative routes to a halt and this happens with worrying frequency.**
