

Dear Sir/Madam

Re Local Plan 2019

Oxford City and the villages to its South are a historic, beautiful and valuable asset.

The air quality in the city is poor.

The Green Belt helps to alleviate this.

The proposed quality and density of housing and associated traffic and infrastructure will make it much worse.

Building on the Green Belt will compromise the existing flora and fauna, including cowslips, hares, badgers and water voles, amongst others.

Yours faithfully

Roland E Knight
