I am concerned with the building of a new housing area north of the brook as there has been recent flooding of the brook in rainy weather even when the ground was dry after long periods of low precipitation. It is well known that when you build on green belt it further expands the flooding plain and will put the houses already built at an increased risk of flooding. The flooding of the brook has already increased since the building of barton fields further upstream.

I implore you to seriously think about the increased risk of flooding to existing residents especially when you take into account the difficulty in selling houses in a risk area. It is also important to consider the inability to sell houses that you build.

Thank you

Q8. If your comments are more than 500 words long, please use the space below to provide a summary. You are not required to summarise your comments, but a summary would help us in our reporting.
